

# Capsule Endoscopy Training Program

5th edition

## TOP 5 REASONS TO ATTEND...

### ...OUR CAPSULE ENDOSCOPY TRAINING PROGRAM:

1. Meet a dedicated team from an internationally renowned Gastroenterology Department, with a vast clinical, investigational and educational experience on the field of capsule endoscopy.
2. Maximize 3-day hands-on experience: individual workstations available for the entire training program, software demonstrations and pre-selected segmented and full videos, with tailored practical teaching to each attendee, adjusted for previous experience in capsule endoscopy.
3. Embrace real-life clinical cases and develop your skills in the interpretation and reporting of endoscopic findings, in the setting of mid-gastrointestinal bleeding, inflammatory bowel disease, polyposis syndromes and celiac disease.
4. Get access to state-of-the-art knowledge on small bowel and colon capsule endoscopy; discover and explore pioneering techniques such as capsule pan-endoscopy and PillCam Crohn's.
5. Certification is granted by the School of Medicine of University of Minho and the Gastroenterology Department of Hospital da Senhora da Oliveira - Guimarães, an approved Training Centre of the European Board of Gastroenterology & Hepatology.

# Programme

## Wednesday, May 20th 2020

08:30-08:50	Registration at ICVS/EM hall
08:50-09:00	Organizing committee welcoming & program overview
09:00-09:15	Capsule endoscopy - What's new in the last year?
09:15-09:30	Behind the scenes: small bowel capsule endoscopy technology
09:30-09:40	Live clinical case I - PillCam SB3
09:40-10:15	RAPID Reader software - practical demonstration. Structured report
10:15-10:30	Coffee-break
10:30-10:45	Iconography. Interpretation of main types of lesions and artifacts
10:45-11:45	Reading: Full case 1 (individual workstation)
11:45-13:00	Reading and discussion of segmented videos (individual workstation)
13:00-14:30	Lunch
14:30-14:45	Risks and contraindications of capsule endoscopy - still something to keep in mind?
14:45-15:00	Bowel preparation for small bowel capsule endoscopy - current status and future perspectives
15:00-15:15	How to assess the small bowel cleansing quality in 2020?
15:15-16:15	Reading: Full case 2 (individual workstation)
16:15-16:30	Coffee-break
16:30-17:30	Reading and discussion of segmented videos (individual workstation)

## Thursday, May 21st 2020

09:00-09:15	Live clinical case II - PillCam COLON 2
09:15-09:30	Mid-gastrointestinal bleeding: occult and visible
09:30-09:45	Virtual chromoendoscopy - seeing is believing?
09:45-10:00	Should we use capsule endoscopy in celiac disease?
10:00-10:15	Small bowel polyps, tumors and subepithelial bulges
10:15-10:30	Coffee-break
10:30-11:30	Reading: Full case 3 (previous day live case) - individual workstation
11:30-13:00	Reading and discussion of segmented videos (individual workstation)
13:00-14:30	Lunch
14:30-14:45	PillCam COLON 2: technology, software & reading technique. Structured report
14:45-15:00	Colon capsule endoscopy: Indications & iconography
15:00-15:15	Bowel preparation for colon capsule endoscopy
15:15-16:15	Reading: Full case 4 (individual workstation)
16:15-16:30	Coffee-break
16:30-18:00	Reading and discussion of segmented videos (individual workstation)

## Friday, May 22nd 2020

09:00-09:15	Activity scores in small bowel Crohn's Disease - why, when and how?
09:15-09:30	Differential diagnosis - practical considerations
09:30-09:45	Should we use patency capsule in Crohn's Disease?
09:45-10:00	PillCam COLON 2 and PillCam Crohn's in IBD: where we are and where we are going
10:00-10:15	Coffee-break
10:15-11:15	Reading: Full case 5 (previous day live case) - individual workstation
11:15-12:15	Reading and discussion of segmented videos (individual workstation)
12:15-12:30	Quiz. Closing remarks

## Capsule Endoscopy Training Program

### 5th edition

#### SCIENTIFIC ENDORSEMENT

#### EDUCATIONAL SUPPORT

#### SCOPE

The School of Medicine of the University of Minho will host the fifth edition of the Capsule Endoscopy Training Program, from May 20th to 22nd, 2020. This is a dedicated course targeted to Gastroenterology trainees and seniors aiming to learn or upskill their knowledge on capsule endoscopy.

The Faculty is granted by the Gastroenterology Department of Hospital da Senhora da Oliveira, Guimarães, Portugal, an approved Training Centre of the European Board of Gastroenterology & Hepatology, with a vast clinical, investigational and educational experience on the field of capsule endoscopy.

The course will cover the main technical and clinical aspects of small bowel and colon capsule endoscopy, including state-of-the-art lectures, technology updates, new software developments, tips and tricks on the reading technique, based on individual workstations for personalized hands-on training.

#### TESTIMONIALS

"The course exceeded my expectations! The prevailing practical component ensures that what you learn in the course you will take home and change your practice!"

**Dr Roberta Marchiori - Porto Alegre, Brazil**

"Every gastroenterologist should have the opportunity to participate in a course like this!"

**Dr Giza Carlos - Luanda, Angola**

"Extremely well-organized course with a good balance of lectures and practical sessions."

**Dr Gisela Silva - Porto, Portugal**

"All the tips and tricks that I learned on the course refined my skills and improved my reading abilities!"

**Dr Roberta Cambraia - São Paulo, Brazil**

May 20-22, 2020
